Elon Musk's xAI Launches Grok-3 Chatbot

1 New Competitor

xAI unveils Grok-3, rivaling ChatGPT and DeepSeek.

2 Availability

Available to Premium+ subscribers on X platform.

3 SuperGrok Tier

New subscription on xAI's app and Grok.com.

Mira Murati's Thinking Machines Lab

Founder

Former OpenAI CTO Mira Murati establishes AI startup in San Francisco.

Mission

Enhance public understanding and accessibility of AI technologies.

Transparency

Regularly publish technical notes, research articles, and source code.

DeepSeek's AI Innovations

High Performance
Chinese startup offers efficient AI models at reduced costs.

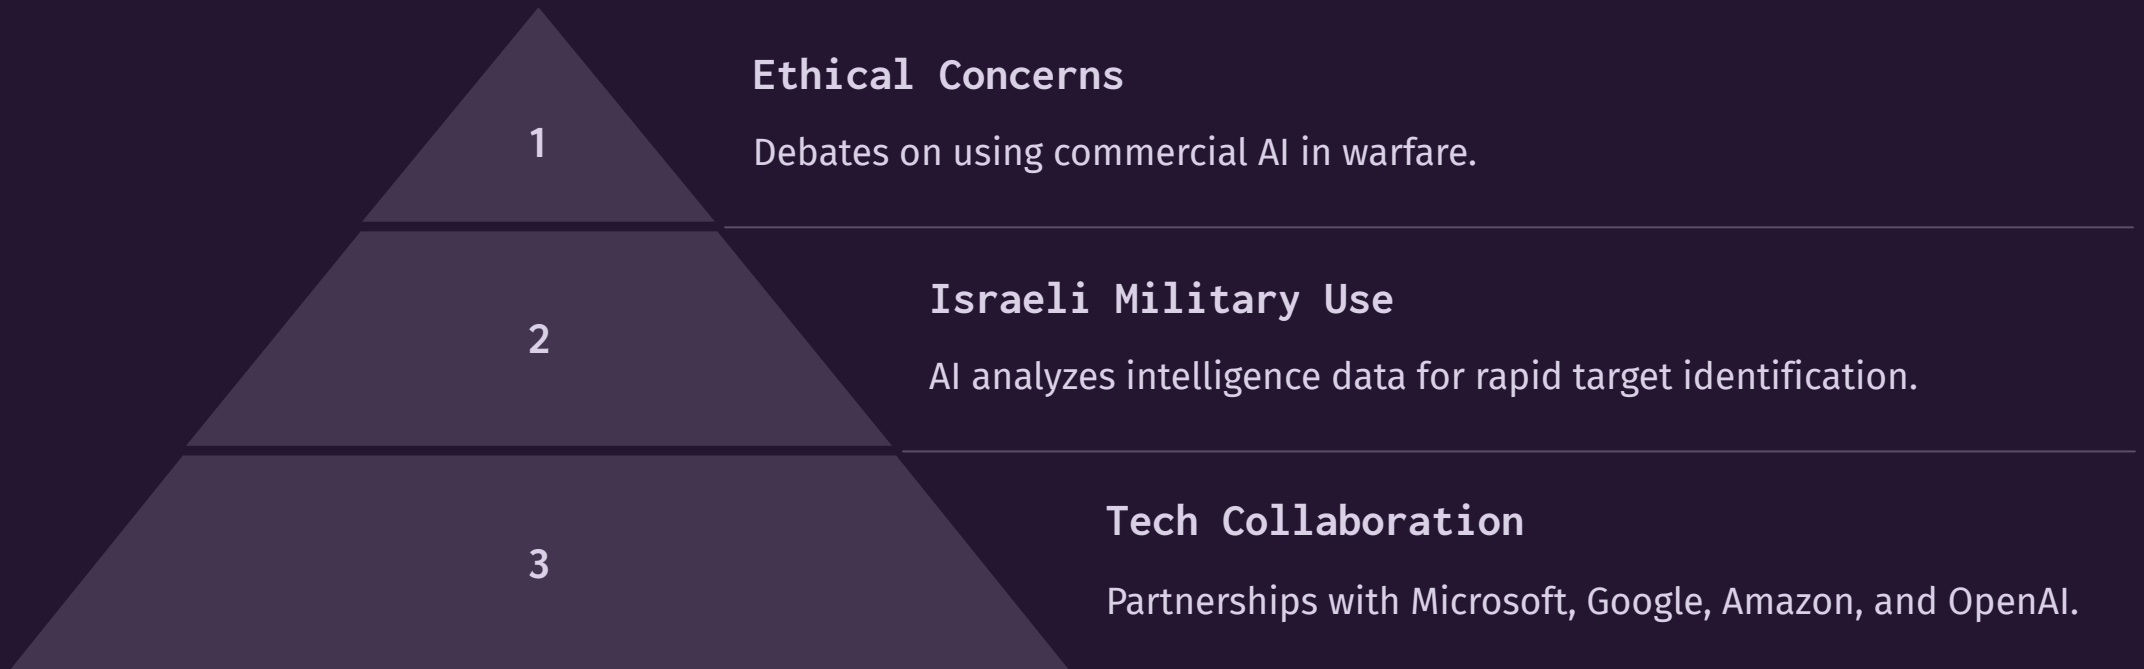

Market Impact

Concerns about decreased demand for energy and processing resources.

Long-term Outlook

Efficiency improvements may drive broader AI adoption.

AI in Military Operations

AI Enhances Post-Operative Documentation

1

AI-Generated Reports

More precise than surgeon-written reports.

2

Computer Vision

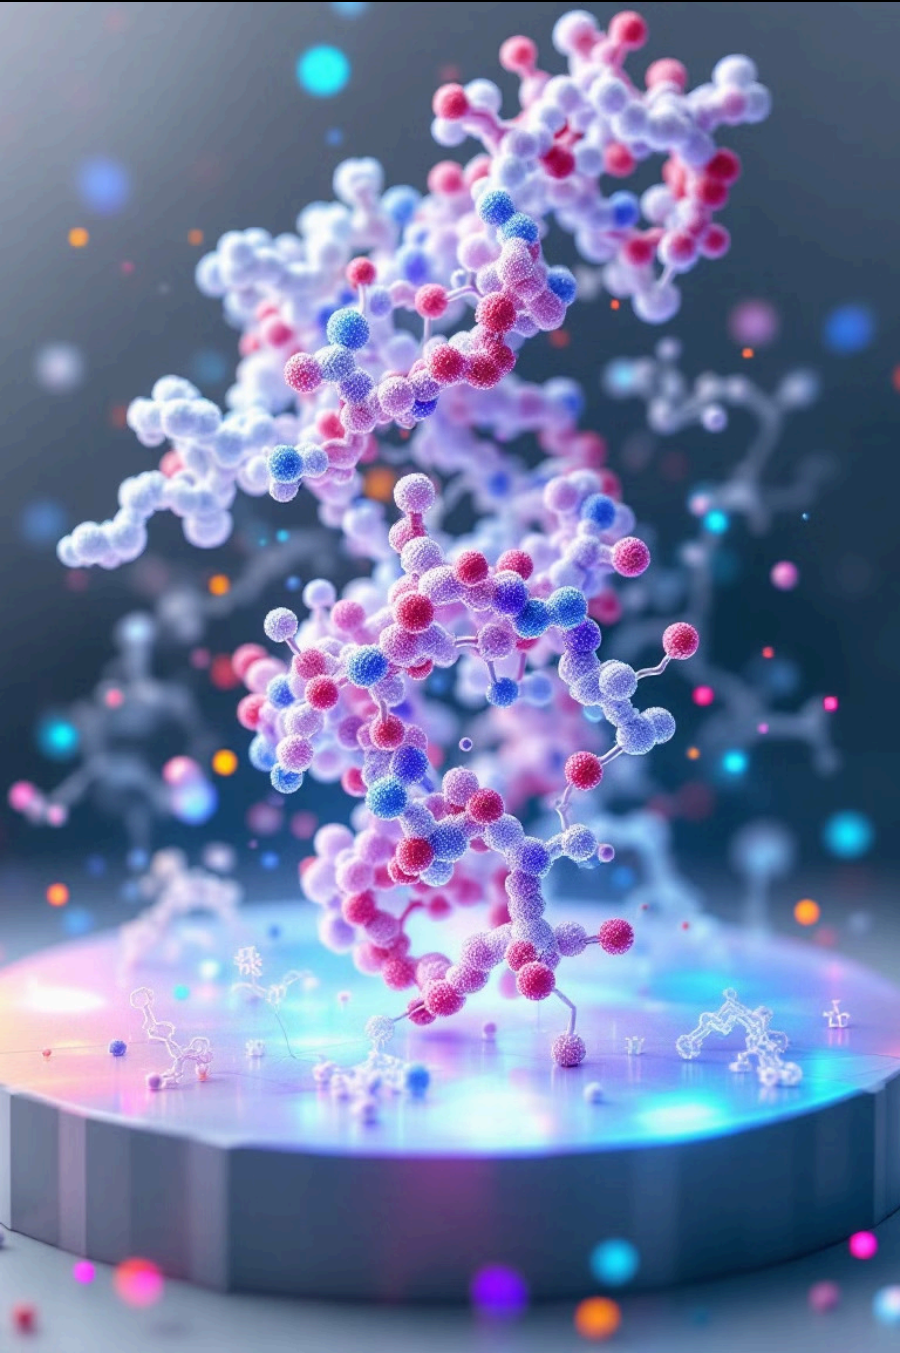

Analyzes videos of robot-assisted surgeries.

3

Improved Accuracy

Fewer discrepancies in AI-generated documentation.

AI-Driven Drug Discovery Funding

Latent Labs

AI-focused drug discovery startup raises \$50 million.

Synthetic Proteins

Aims to design proteins for potential therapeutic use.

Generative AI

Leverages AI to expedite and reduce drug development costs.

AI Integration in Financial Services

1

Tiger Brokers

Incorporates DeepSeek-R1 into TigerGPT chatbot.

2

Market Analysis

Enhances trading capabilities for customers.

3

Widespread Adoption

20+ Chinese financial institutions use DeepSeek's models.

Abridge's \$250 Million Funding for Healthcare AI

Healthcare Focus

Pittsburgh-based startup automates clinical notes and medical documentation.

Administrative Relief

Aims to reduce burdens on clinicians.

Patient Care

Allows providers to focus more on patient interaction.
